- **Net income from continuing operations of \$184 million, or \$.21 per common share, for the first quarter of 2011**
- **Net interest margin at 3.25% for the first quarter of 2011**
- **Nonperforming loans declined \$183 million to 1.82% of period-end loans**
- **Nonperforming assets declined \$249 million**
- **Loan loss reserve at 2.83% of total period-end loans**
- **Net charge-offs declined to \$193 million, or 1.59% of average loan balances, for the first quarter of 2011**
- **Repurchased \$2.5 billion of preferred stock related to participation in TARP**
- **Tier 1 common equity and Tier 1 risk-based capital ratios estimated at 10.70% and 13.44%, respectively, at March 31, 2011**

CLEVELAND, April 18, 2011 – KeyCorp (NYSE: KEY) today announced first quarter net income from continuing operations attributable to Key common shareholders of \$184 million, or \$.21 per common share. These results were after the accelerated amortization of the discount on the repurchased preferred shares from the U.S. Treasury (“deemed dividend”) of \$49 million, or \$.06 per diluted common share, during the first quarter. Key’s first quarter 2011 results compare to a net loss from continuing operations attributable to Key common shareholders of \$98 million, or \$.11 per common share, for the first quarter of 2010. The first quarter 2011 results reflect an improvement in noninterest expense and lower credit costs from the same period one-year ago. First quarter 2011 net income attributable to Key common shareholders was \$173 million compared to a net loss attributable to Key common shareholders of \$96 million for the same quarter one year ago.

During the first quarter of 2011, the Company continued to benefit from improved asset quality in both Key Community Bank and Key Corporate Bank. Nonperforming assets declined \$1.3 billion, and nonperforming loans decreased by \$1.2 billion from the year-ago

quarter to \$1.1 billion and \$885 million, respectively. Net charge-offs declined \$329 million from the first quarter of 2010 to \$193 million, or 1.59%, of average loan balances for the first quarter of 2011.

“Our first quarter results demonstrate continued improvement in asset quality and disciplined expense control, and underscore our successful emergence from the recession,” said Chairman and Chief Executive Officer Henry L. Meyer III. “Coupled with our successful capital actions during the quarter and TARP repayment, Key emerges in an excellent position to compete and grow under the leadership of CEO-elect Beth Mooney and her team.”

Meyer added: “Our aggressive actions to exit riskier lending categories, which began over four years ago, have led to significant credit quality improvement again this quarter, placing our credit statistics at or near the top of our peer group. In addition, our concerted efforts to improve Key’s efficiency and effectiveness under Keyvolution have resulted in approximately \$317 million in annualized cost savings through the first quarter of 2011.”

“Key is well positioned for a range of opportunities based on our strong capital, balance sheet and liquidity,” said Mooney, who will become KeyCorp Chairman and CEO effective May 1. “We expect to continue to see decreasing levels of net charge-offs and nonperforming assets during 2011. Strong capital provides us the flexibility to make investments in our relationship businesses, look for opportunities to build market share in target markets, and meet our clients’ needs for credit and financial services as demand increases with an improving economy.”

The Company expects to build 40 new branches in 2011, having opened eight new branches in the first quarter of 2011 and 77 others in the prior two calendar years. The Company continues its multi-year branch building and renovation project which has resulted in approximately one-third of Key’s 1,040 branches in its 14 state-branch network either being newly constructed or remodeled over the past four years. In addition, Key originated approximately \$6.9 billion in new or renewed lending commitments to consumers and businesses during the first quarter, which is up from \$5.3 billion from the same period one year ago.

At March 31, 2011, Key’s estimated Tier 1 common equity and Tier 1 risk-based capital ratios were 10.70% and 13.44%, compared to 9.34% and 15.16%, respectively, at December 31, 2010. During the first quarter of 2011, Key completed the repurchase of the \$2.5 billion of Fixed-Rate Perpetual Preferred Stock, Series B issued to the U.S. Treasury Department as a result of Key’s participation in the U.S. Treasury’s Capital Purchase Program of the Troubled Asset Relief Program (“TARP”). The transaction followed Key’s successful completion of a \$625 million common equity offering and a \$1 billion debt offering. The Board of Directors is expected to consider a dividend increase in the second quarter.

As a result of the repurchase of the U.S. Treasury’s preferred stock investment in Key, the Company recorded a \$49 million one-time deemed dividend related to the remaining difference between the repurchase price and the carrying value of the preferred shares at the time of repurchase. Beginning with the second quarter of 2011, the repurchase will result in the elimination of \$31 million in dividends and \$4 million of discount amortization, or \$140 million on an annual basis, related to these preferred shares. The only remaining item related to TARP is the potential repurchase of the warrant granted to the U.S. Treasury for the purchase of 35,244,361 shares of Key common stock at a purchase price of \$10.64 per share (the “Warrant”). Key has notified the U.S. Treasury of its intent to repurchase the Warrant.

The following table shows Key's continuing and discontinued operating results for the three-month periods ended March 31, 2011, December 31, 2010 and March 31, 2010.

- (a) In September 2009, management made the decision to discontinue the education lending business conducted through Key Education Resources, the education payment and financing unit of KeyBank National Association. In April 2009, management made the decision to curtail the operations of Austin Capital Management, Ltd., an investment subsidiary that specializes in managing hedge fund investments for its institutional customer base. As a result of these decisions, Key has accounted for these businesses as discontinued operations. The loss from discontinued operations for the three-month period ended March 31, 2011, was primarily attributable to fair value adjustments related to the education lending securitization trusts.
- (b) 3-31-11 includes a \$49 million deemed dividend.

SUMMARY OF CONTINUING OPERATIONS

Taxable-equivalent net interest income was \$604 million for the first quarter of 2011, and the net interest margin was 3.25%. These results compare to taxable-equivalent net interest income of \$632 million and a net interest margin of 3.19% for the first quarter of 2010. The increase in the net interest margin primarily reflects the Company's efforts to lower funding costs by reducing the level of higher costing certificates of deposit and growing lower costing transaction accounts. This benefit to the net interest margin was offset by a lower level of average earning assets and a change in asset mix as loans paid down.

Compared to the fourth quarter of 2010, taxable-equivalent net interest income decreased by \$31 million, and the net interest margin declined six basis points. The decline in the net interest margin and net interest income reflects the combined effect of hedge maturities and the change in the mix and lower levels of earning assets as average loan balances declined.

Key's noninterest income was \$457 million for the first quarter of 2011, compared to \$450 million for the year-ago quarter. Investment banking and capital markets income increased \$34 million compared to the same period one-year ago. A \$10 million increase in investment banking income and a reduction in the customer derivative reserve in the first quarter of 2011 compared to an increase in this reserve one year ago contributed to this improvement. In addition, letter of credit and loan fees and net gains (losses) from loan sales both increased \$15 million from the first quarter of 2010. These increases were partially offset by declines in other income of \$22 million and operating lease income of \$12 million. Also, service charges on deposit accounts decreased \$8 million compared to the same period one-year

ago as a result of the changes associated with implementing Regulation E in the third quarter of 2010.

The major components of Key's noninterest income for the past five quarters are shown in the following table.

Noninterest Income – Major Components

<i>in millions</i>	1Q11	4Q10	3Q10	2Q10	1Q10
Trust and investment services income	\$ 110	\$ 108	\$ 110	\$ 112	\$ 114
Service charges on deposit accounts	68	70	75	80	76
Operating lease income	35	42	41	43	47

Corporate-owned life insurance income	27	42	39	28	28
Electronic banking fees	30	31	30	29	27
Insurance income	15	12	15	19	18
Net gains (losses) from loan sales	19	29	18	25	4
Net gains (losses) from principal investing	35	(6)	18	17	37
Investment banking and capital markets income (loss)	43	63	42	31	9

Compared to the fourth quarter of 2010, noninterest income decreased by \$69 million. The decline was a result of lower investment banking and capital markets income of \$20 million, corporate-owned life insurance income of \$15 million, net securities gains (losses) of \$13 million, and net gains (losses) from loan sales of \$10 million. In addition, the Company realized a gain of \$28 million from the sale of Tuition Management Systems in the fourth quarter of 2010. These decreases were partially offset by an increase of \$41 million in net gains (losses) from principal investing (including results attributable to noncontrolling interests).

Key's noninterest expense was \$701 million for the first quarter of 2011, compared to \$785 million for the same period last year. Contributing to the decrease in noninterest expense were declines of \$22 million in other real estate owned ("OREO") expense, \$11 million in operating lease expense, and \$8 million in FDIC deposit insurance premiums. Key also experienced a decline of \$43 million in various miscellaneous expenses.

Compared to the fourth quarter of 2010, noninterest expense decreased by \$43 million. Decreases in noninterest expense included \$18 million in business services and professional fees, \$12 million in marketing costs, and \$35 million in various miscellaneous expenses. These decreases were partially offset by Key's provision (credit) for losses on lending-related commitments which declined from a credit of \$26 million in the fourth quarter of 2010 to a credit of \$4 million in the current quarter.

ASSET QUALITY

Key's provision for loan and lease losses was a credit of \$40 million for the first quarter of 2011, compared to a charge of \$413 million for the year-ago quarter and a credit of \$97 million for the fourth quarter of 2010. Key's allowance for loan and lease losses was \$1.4 billion, or 2.83% of total period-end loans, at March 31, 2011, compared to 3.20% at December 31, 2010, and 4.34% at March 31, 2010.

Selected asset quality statistics for Key for each of the past five quarters are presented in the following table.

(a) Includes the allowance for loan losses plus the liability for credit losses on lending-related commitments.

Net loan charge-offs for the quarter totaled \$193 million, or 1.59%, of average loans. These results compare to \$522 million, or 3.67%, for the same period last year and \$256 million, or 2.00%, for the previous quarter. Net loan charge-offs have declined for the last five consecutive quarters.

Key's net loan charge-offs by loan type for each of the past five quarters are shown in the following table.

Compared to the fourth quarter of 2010, net loan charge-offs in the commercial loan portfolio decreased by \$56 million. The decrease was primarily attributable to a decline in the commercial, financial and agricultural and the real estate – commercial mortgage loan portfolios. As shown in the table on page 6, Key's exit loan portfolio accounted for \$41 million, or 21.24%, of Key's total net loan charge-offs for the first quarter of 2011. Net charge-offs in the exit loan portfolio decreased by \$40 million from the fourth quarter of 2010, primarily driven by an improvement in the commercial loan portfolio.

At March 31, 2011, Key's nonperforming loans totaled \$885 million and represented 1.82% of period-end portfolio loans, compared to 2.13% at December 31, 2010, and 3.69% at March 31, 2010. Nonperforming assets at March 31, 2011, totaled \$1.1 billion and represented 2.23% of portfolio loans and OREO and other nonperforming assets, compared to 2.66% at

December 31, 2010, and 4.31% at March 31, 2010. The following table illustrates the trend in Key's nonperforming assets by loan type over the past five quarters.

- (a) Restructured loans (i.e. troubled debt restructurings) are those for which Key, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. These concessions are made to improve the collectability of the loan and generally take the form of a reduction of the interest rate, extension of the maturity date or reduction in the principal balance.

Nonperforming assets continued to decrease during the first quarter of 2011, representing the sixth consecutive quarterly decline. Each of the categories within nonperforming assets experienced reductions in the first quarter. As shown in the following table, Key's exit loan portfolio accounted for \$145 million, or 13.31%, of Key's total nonperforming assets at March 31, 2011, compared to \$210 million, or 15.70%, at December 31, 2010.

The following table shows the composition of Key's exit loan portfolio at March 31, 2011, and December 31, 2010, the net charge-offs recorded on this portfolio for the first quarter of 2011 and fourth quarter of 2010, and the nonperforming status of these loans at March 31, 2011, and December 31, 2010.

CAPITAL

Key's estimated risk-based capital ratios included in the following table continued to exceed all "well-capitalized" regulatory benchmarks at March 31, 2011.

(a) 3-31-11 ratio is estimated.

(b) The table entitled "GAAP to Non-GAAP Reconciliations" presents the computations of certain financial measures related to "tangible common equity" and "Tier 1 common equity." The table reconciles the GAAP performance measures to the corresponding non-GAAP measures, which provides a basis for period-to-period comparisons.

As shown in the preceding table, at March 31, 2011, Key's estimated Tier 1 common equity ratio stood at 10.70%, placing it in the top quartile of its peer group for this ratio. In addition, Key's estimated Tier 1 risk-based capital ratio stood at 13.44%, and its tangible common equity ratio was 9.16% at March 31, 2011. Since March 31, 2010, Key's Tier 1 common equity ratio has increased 319 basis points as a result of four consecutive quarters of profitability, a lower level of risk-weighted assets, and the March 2011 \$625 million common equity raise.

The changes in Key's outstanding common shares over the past five quarters are summarized in the following table.

Summary of Changes in Common Shares Outstanding

<i>in thousands</i>	1Q11	4Q10	3Q10	2Q10	1Q10

During the first quarter of 2011, Key completed the repurchase of the \$2.5 billion of Fixed-Rate Perpetual Preferred Stock, Series B issued to the U.S. Treasury Department as a result of Key's participation in the U.S. Treasury's Capital Purchase Program. The transaction followed Key's successful completion of a \$625 million common equity offering and a \$1 billion debt offering. The proceeds from the equity and debt offerings, along with other available funds, were used to repurchase the preferred shares.

LINE OF BUSINESS RESULTS

The following table shows the contribution made by each major business segment to Key's taxable-equivalent revenue from continuing operations and income (loss) from continuing operations attributable to Key for the periods presented. The specific lines of business that comprise each of the major business segments are described under the heading "Line of Business Descriptions." For more detailed financial information pertaining to each business segment and its respective lines of business, see the tables at the end of this release.

Key Community Bank Summary of Operations

Key Community Bank recorded net income attributable to Key of \$81 million for the first quarter of 2011, compared to net income attributable to Key of \$13 million for the year-ago quarter. A substantial decrease in the provision for loan and lease losses drove the improvement in the first quarter of 2011.

Taxable-equivalent net interest income declined by \$34 million, or 8%, from the first quarter of 2010, due to declines in average earning assets and average deposits. Average earning assets decreased by \$1 billion, or 5%, from the year-ago quarter, reflecting reductions in the commercial loan and home equity loan portfolios. Average deposits declined by \$3 billion, or 6%, as higher-costing certificates of deposit mature, partially offset by growth in noninterest-bearing deposits and NOW and money market deposit accounts.

Noninterest income increased by \$5 million, or 3%, from the year-ago quarter, due to higher income from net gains from loan sales, electronic banking fees, trust and investment services, and a reduction in the provision for credit losses from client derivatives. These factors were partially offset by lower service charges on deposits from the implementation of Regulation E.

The provision for loan and lease losses declined by \$131 million, or 92%, compared to the first quarter of 2010 due to improving economic conditions resulting in lower net charge-offs and nonperforming loans from the same period one year ago.

Noninterest expense declined by \$6 million, or 1%, from the year-ago quarter. The decrease was driven by reductions in FDIC deposit insurance premiums and corporate allocated costs. These improvements were partially offset by increases in personnel expense and business services and professional fees, reflecting the cost of our third-party mortgage operations.

Key Corporate Bank Summary of Operations

Key Corporate Bank recorded net income attributable to Key of \$125 million for the first quarter of 2011, compared to a net loss attributable to Key of \$36 million for the same period one year ago. This improvement in the first quarter of 2011 was a result of a substantial decrease in the provision for loan and lease losses.

Taxable-equivalent net interest income decreased by \$10 million, or 5%, compared to the first quarter of 2010, primarily due to lower earning assets and deposits. Average earning assets decreased by \$5 billion, or 21% from the year-ago quarter. Average deposits declined by \$938 million, or 8%, from one year ago. During the first quarter of 2011, approximately \$1.5 billion of escrow deposits associated with Key's mortgage servicing operations were moved to

another financial institution as a result of the previously reported ratings downgrade of KeyBank National Association by Moody's in November 2010.

Noninterest income increased by \$41 million, or 23%, from the first quarter of 2010. Investment banking and capital markets income increased \$39 million. The first quarter of 2010 included a \$21 million provision for losses on customer derivatives compared to a credit of \$9 million in the first quarter of 2011. This improvement was partially offset by lower levels of fixed income and equity trading income. Investment banking income increased primarily due to increased levels of debt and equity financings. Also contributing to the improvement in noninterest income was a \$16 million increase in letter of credit and loan fees related to an increase in syndication fees. These gains were partially offset by decreases in trust and investment services income of \$7 million and operating lease revenue of \$5 million.

The provision for loan and lease losses in the first quarter of 2011 was a credit of \$21 million compared to a charge of \$161 million for the same period one year ago. Key Corporate Bank continued to experience improved asset quality for the sixth quarter in a row.

Noninterest expense decreased by \$44 million, or 16%, from the first quarter of 2010 due in part to a \$24 million decline in OREO expense. Also contributing to the improvement was a \$34 million decrease in various miscellaneous expenses and a \$5 million decline in corporate overhead. These improvements were partially offset by an increase in personnel expense.

Other Segments

Other Segments consist of Corporate Treasury, Key's Principal Investing unit and various exit portfolios. Other Segments generated net income attributable to Key of \$58 million for the first quarter of 2011, compared to a net loss attributable to Key of \$49 million for the same period last year. These results are primarily attributable to a decrease in the provision for loan and lease losses and noninterest expense.

Line of Business Descriptions

Key Community Bank

Regional Banking provides individuals with branch-based deposit and investment products, personal finance services and loans, including residential mortgages, home equity and various types of installment loans. This line of business also provides small businesses with deposit, investment and credit products, and business advisory services.

Regional Banking also offers financial, estate and retirement planning, and asset management services to assist high-net-worth clients with their banking, trust, portfolio management, insurance, charitable giving and related needs.

Commercial Banking provides midsize businesses with products and services that include commercial lending, cash management, equipment leasing, investment and employee benefit programs, succession planning, access to capital markets, derivatives and foreign exchange.

Key Corporate Bank

Real Estate Capital and Corporate Banking Services consists of two business units, Real Estate Capital and Corporate Banking Services.

Real Estate Capital is a national business that provides construction and interim lending, permanent debt placements and servicing, equity and investment banking, and other

commercial banking products and services to developers, brokers and owner-investors. This unit deals primarily with nonowner-occupied properties (i.e., generally properties in which at least 50% of the debt service is provided by rental income from nonaffiliated third parties). Real Estate Capital emphasizes providing clients with finance solutions through access to the capital markets.

Corporate Banking Services provides cash management, interest rate derivatives, and foreign exchange products and services to clients served by both the Key Community Bank and Key Corporate Bank groups. Through its Public Sector and Financial Institutions businesses, Corporate Banking Services also provides a full array of commercial banking products and services to government and not-for-profit entities and community banks. A variety of cash management services are provided through the Global Treasury Management unit.

Equipment Finance meets the equipment leasing needs of companies worldwide and provides equipment manufacturers, distributors and resellers with financing options for their clients. Lease financing receivables and related revenues are assigned to other lines of business (primarily Institutional and Capital Markets and Commercial Banking) if those businesses are principally responsible for maintaining the relationship with the client.

Institutional and Capital Markets, through its KeyBanc Capital Markets unit, provides commercial lending, treasury management, investment banking, derivatives, foreign exchange, equity and debt underwriting and trading, and syndicated finance products and services to large corporations and middle-market companies.

Institutional and Capital Markets, through its Victory Capital Management unit, also manages or offers advice regarding investment portfolios for a national client base, including corporations, labor unions, not-for-profit organizations, governments and individuals. These portfolios may be managed in separate accounts, common funds or the Victory family of mutual funds.

Cleveland-based KeyCorp (NYSE: KEY) is one of the nation's largest bank-based financial services companies, with assets of approximately \$90 billion at March 31, 2011. Key companies provide investment management, retail and commercial banking, and investment banking products and services to individuals and companies throughout the United States and, for certain businesses, internationally. In 2010, KeyBank scored significantly higher than its four largest competitor banks in a customer satisfaction survey conducted by the American Customer Satisfaction Index, scoring significantly better than bank industry scores across multiple dimensions, most notably Customer Loyalty. Key also has been recognized for excellence in numerous areas of the multi-channel customer banking experience, including Corporate Insight's 2010 edition of *Bank Monitor* for online service. GAAP to Non-GAAP Reconciliations
(dollars in millions, except per share amounts)

The table below presents the computations of certain financial measures related to “tangible common equity,” “Tier 1 common equity” and “pre-provision net revenue.” The tangible common equity ratio has become a focus of some investors, and management believes that this ratio may assist investors in analyzing Key’s capital position absent the effects of intangible assets and preferred stock. Traditionally, the banking regulators have assessed bank and bank holding company capital adequacy based on both the amount and composition of capital, the calculation of which is prescribed in federal banking regulations. As a result of the Supervisory Capital Assessment Program, the Federal Reserve has focused its assessment of capital adequacy on a component of Tier 1 capital, known as Tier 1 common equity. Because the Federal Reserve has long indicated that voting common shareholders’ equity (essentially Tier 1 capital less preferred stock, qualifying capital securities and noncontrolling interests in subsidiaries) generally should be the dominant element in Tier 1 capital, such a focus is consistent with existing capital adequacy guidelines and does not imply a new or ongoing capital standard. Because Tier 1 common equity is neither formally defined by GAAP nor prescribed in amount by federal banking regulations, this measure is considered to be a non-GAAP financial measure. Since analysts and banking regulators may assess Key’s capital adequacy using tangible common equity and Tier 1 common equity, management believes it is useful to provide investors the ability to assess Key’s capital adequacy on these same bases. The table also reconciles the GAAP performance measures to the corresponding non-GAAP measures.

The table also shows the computation for pre-provision net revenue, which is not formally defined by GAAP. Management believes that eliminating the effects of provision for loan and lease losses facilitates the analysis of results by presenting them on a more comparable basis.

Non-GAAP financial measures have inherent limitations, are not required to be uniformly applied and are not audited. To mitigate these limitations, Key has procedures in place to ensure that these measures are calculated using the appropriate GAAP or regulatory components, and to ensure that Key’s performance is properly reflected to facilitate period-to-period comparisons. Although these non-GAAP financial measures are frequently used by investors in the evaluation of a company, they have limitations as analytical tools, and should not be considered in isolation, or as a substitute for analyses of results as reported under GAAP.

(a) Results are from continuing operations. Interest excludes the interest associated with the liabilities referred to in (d) below, calculated using a matched funds transfer pricing methodology.

(b) Interest income on tax-exempt securities and loans has been adjusted to a taxable-equivalent basis using the statutory federal income tax rate of 35%.

(c) For purposes of these computations, nonaccrual loans are included in average loan balances.

(d) Discontinued liabilities include the liabilities of the education lending business and the dollar amount of any additional liabilities assumed necessary to support the assets associated with this business.

(e) Yield is calculated on the basis of amortized cost.

(f) Rate calculation excludes basis adjustments related to fair value hedges.

TE = Taxable Equivalent, GAAP = U.S. generally accepted accounting principles

(a) Restructured loans (i.e. troubled debt restructurings) are those for which Key, for reasons related to a borrower's financial difficulties, grants a concession to the borrower that it would not otherwise consider. These concessions are made to improve the collectability of the loan and generally take the form of a reduction of the interest rate, extension of the maturity date or reduction in the principal balance.
